

Ultrasound Instructor (NHS-Experienced)

We are seeking two doctors with substantial ultrasound and clinical decision-making experience within the NHS to join our teaching faculty. There is potential for the role to progress from day-based employment to a more substantive position over time.

Role Overview:

As an Ultrasound Instructor, you will support the teaching of our ultrasound courses. These courses focus on practical ultrasound skills using normal volunteers, ultrasound simulators, and scannable manikins. You will assist learners by providing guidance on equipment usage, probe handling, image acquisition, and identifying pathological appearances. On teaching days, you will initially work alongside an experienced faculty member, moving between different types of ultrasound equipment to offer practical support to candidates, with the opportunity to progress towards leading your own teams. Our learners will range from beginners to those with basic ultrasound knowledge, and your role will be key to building their confidence and proficiency.

Key Responsibilities:

- Support in managing groups during practical ultrasound training sessions, focusing on equipment handling, image optimisation, and pathology recognition.
- Provide guidance on the use of various ultrasound systems, including handheld devices and simulators.
- Support learners in developing their skills in a safe and encouraging environment.
- Develop a strong knowledge of our ultrasound machines, handheld systems (e.g., Butterfly IQ+), and state-of-the-art simulators (BodyWorks and HeartWorks).
- Gain familiarity with our student-centred teaching philosophy and actively contribute to the development of learners.
- Work on a flexible, ad-hoc basis with potential for more senior responsibilities in ultrasound teaching and other courses.

Ideal Candidate:

- Experience with ultrasound, either point-of-care ultrasound (POCUS) or in diagnostic imaging is essential. Experience in teaching ultrasound skills is desirable.
- Familiarity with a variety of ultrasound systems, with the ability to advise learners on image acquisition and the recognition of pathological features.
- Dexterity and confidence in handling ultrasound equipment.
- Experience making clinical decisions within the NHS or equivalent, ideally with an Emergency Medicine focus.
- Strong communication skills to explain concepts clearly to learners with different levels of expertise.
- Willingness to learn and grow within the role, with the potential to take on greater responsibility over time.
- Enthusiasm for teaching and contributing to the development of future ultrasound practitioners.

Course Day Structure:

Teaching days run from 9:00 am to 5:15 pm.

Each day includes four practical scanning sessions of approximately one hour each, following a lecture delivered by senior faculty.

You will be actively involved in all scanning sessions, providing hands-on assistance to learners.

Benefits:

- Competitive daily rate: £200, paid weekly.
- Opportunity to enhance your ultrasound skills and your familiarity with modern ultrasound technology.
- Potential to progress into a salaried, more senior team lead role over time.
- Flexible working arrangements, ideal for those looking for part-time employment while managing other commitments.

About Us:

Bromley Emergency Training & Research Ltd is a leading medical training company established in 2005. Based near London Bridge Station, we specialise in providing high quality medical courses to doctors and other clinicians working in acute and emergency settings. We run a large number of ultrasound courses, primarily for beginners. Our state-of-the art training equipment includes ten ultrasound systems, handheld devices (e.g., Butterfly IQ+), scannable manikins, and cutting-edge simulators (BodyWorks and HeartWorks). If you're passionate about ultrasound and want to play a role in training the next generation of healthcare professionals, we invite you to apply!

How to Apply:

Please send your CV and a brief cover letter explaining your relevant experience and interest in the role to: recruitment@bromleyemergency.com
